

YIHANG (HENRY) YANG

Biomedical Field Service Engineer | Sydney

Sydney, NSW | 0436 016 660 | yangyihang96@gmail.com | Driver licence | Sydney field travel | Work-right check ready

PROFESSIONAL PROFILE

Nearly three years of full-time field and workshop service experience at Nova Biomedical Australia across hospital and pharmacy medical equipment. Core strengths include PM, fault diagnosis, repair, installation support, verification, and service documentation.

PROFESSIONAL EXPERIENCE

Biomedical Engineer | Nova Biomedical Australia

Jul 2023 - Present

Australia-wide field service / workshop support

- Perform PM, fault diagnosis, repair, installation support, verification, and service documentation across field and workshop settings.
- Support ventilation, patient monitoring, ultrasound, DEXA, pharmacy automation, X-ray support, and general biomedical equipment.
- Returned devices with functional checks, performance evidence, or clear escalation status.
- Maintain Simpro work orders, service reports, equipment history, and customer updates so service decisions remain traceable.
- Hand over next-use status clearly to clinical users, biomedical teams, vendors, and internal engineers.

EQUIPMENT AND TRAINING SCOPE

- Respiratory: V60, V60 Plus, Trilogy; planned service, checks, and troubleshooting preparation.
- Monitoring: Avalon, Efficia, HeartStart; service preparation, checks, and handover notes.
- Imaging and diagnostics: EPIQ, Affiniti, CX30, CX50, Horizon DEXA, and X-ray support.
- Pharmacy automation: BD FIX100, Pyxis, ROWA, workflow awareness, records, and handover.

TECHNICAL SKILLS

- Functional testing, performance checks, electrical safety awareness, manufacturer procedures, and service reports.
- Simpro, equipment history, serial tracking, customer updates, Microsoft Office, Excel, MATLAB, SolidWorks, and Visio.
- Mandarin Chinese native; English professional working proficiency.

EARLIER HEALTHCARE RECORDS

- Pharmacovigilance Department Assistant, Lundbeck Beijing, Dec 2019 - Feb 2020.
- Supported adverse reaction record handling and regulated drug-safety documentation.

EDUCATION

- Master of Philosophy, The University of Sydney, awarded Jun 2024.
- Bachelor of Biomedical Engineering, The University of Sydney, Feb 2017 - Dec 2020.
- MPhil thesis: Flexible Electrodes for Smart Bandages: Feasibility Exploration.

SELECTED SERVICE OUTCOMES

- Supported PM, repair, verification, and documentation across ventilation, monitoring, ultrasound, DEXA, pharmacy automation, and general biomedical equipment in hospital, pharmacy, and workshop settings.
- Diagnosed user-reported faults by separating use condition, repair history, reproducible symptoms, service-manual steps, and post-repair verification.
- Reduced repeat troubleshooting time by keeping service actions, test notes, equipment history, and customer updates aligned in Simpro.

ROLE FIT

- Best fit: Biomedical Field Service Engineer, Medical Device Service Engineer, or Clinical Engineering service support roles.
- Field readiness: Sydney-based, driver licence, open to field travel, English / Mandarin communication.
- Screening readiness: work-right check ready for a formal hiring process.
